Stanford Lembeck, AICP

Chairman, PA Municipal Planning
Education Institute

Mark Stephens, P.G., PA DEP

Support from the Water Resources Education Network, a project of the League of Women Voters of PA Citizen Education Fund, has made it possible for PSAB to reduce the cost of this class to \$15 per person for materials.

Water is Life. The protection of drinking water sources is everyone's concern.

As a local official, you play a key role in the quality of your community's drinking water now and for future generations. Join us and learn how you can improve public health, safety and welfare through protection of vital resources that furnish public drinking water to over 85% of Pennsylvania residents.

Source water protection offers the cheapest and best insurance against costly impairment that can jeopardize water supply sources and threaten public health. More and more forward-thinking Pennsylvania communities are taking action to make sure the local ecosystems we rely upon for drinking water will be sustainable.

The Source Water Protection 101 Course is designed to equip you with the tools and techniques you need to carry out your land use responsibilities in a manner that will ensure the long-term reliable supply of safe, affordable drinking water.

The Program will also outline the Source Water Protection Program (SWPTAP) available through DEP that offers technical assistance at no out of pocket cost to water systems or municipalities. The Source Water Protection 101 Course is designed for new and experienced officials and planners, and anyone interested in safe drinking water.

Course will cover:

- Basics and components of source water protection
- Types of contaminants and contaminant pathways
- The interrelationship of land use and water
- Source water protection strategies
- Source Water Protection resources available in PA
- Role of public education and involvement
- Multi-municipal opportunities and the emergence of new source water coalitions in Pennsylvania

Fee of \$15 includes instruction, course materials, and refreshments.
