

Whaddya Know About H₂O?

WATER CYCLE	GETTING IT TO YOU	AROUND THE HOUSE	SURPRISING TO KNOW	DON'T WASTE THE WATER
Water that runs off the soil's surface	A natural or man made lake that holds a water supply	Hey, Dad! Don't sing too long in here. You're wasting 10-20 gallons each time.	97% of the earth's water is found here	Best time of day to water your lawn
Water that is beneath the ground's surface	These above ground structures also hold water	Flushing me takes approx. 5 gallons of H ₂ O	You can live a month without food, but how long without H ₂ O?	Always load up these 2 appliances. Be smart before you start
Changing of a liquid to vapor or gas	Place where water is treated for our use	Your dentist will approve, but you'll use 1 gallon of water a day doing this	Water is the only substance found in 3 forms: solid, liquid and	Keep a jug of water here instead of running the faucet.
Changing of water vapor into liquid	System of pipes from the treatment plant to our streets	It'll give you a warm feeling, but you'll use 36 gallons of water	This garden vegetable is 95% water	Fixing these can help fix your water bill.
Common term for rain, snow, sleet or hail	Smaller lines connected to the main serving our homes and businesses	More water us used here than any room in the house	This body organ is 75% water. (Think!)	You'll get a clean sweep with this instead of using a hose on your driveway.
